

Waibira Community Chimpanzees

(last update in Jan 2018 C. Hobaiter)

* core females seen once a week; ** peripheral females seen most months; *** rare females seen only a few times a year

FEMALES & THEIR OFFSPRING

AKK Akiki** (30yrs; 1988 ± 3yrs) adult: Hair on top of head sticks up around medium size bald spot. Wide nostrils, long face, very long body hair.

ARD **Ardbeg** ♂ (AKK1; 13yrs; 2005 ± 1yr) subadult: Dent down middle of nose, relatively flat brow ridge, big ears.

AIM **Aimee** ♀ (AKK2; 3yrs; 1 Oct 2015 ± 2weeks) infant.

ARU Arua** (37yrs; 1981 ± 5yrs) adult: Clear scar/lump on right-hand side of flat broad nose, small but clear bald patch, deep-set eyes under very prominent brow ridge that continues around eyes, very large round ears, small tidy white beard under chin.

AND **Andrua** ♂ (ARU1; 10yrs; 2008 ± 1yr) juvenile: Small widows peak, strong brow-ridge, fold across the inside centre of left ear, June 2012 – firstly seen with snare injury, missing left hand above wrist.

ASM **Asimwe** ♀ (ARU2; 5yrs; August 2013 ± 1month) infant.

BAH Bahati* (24yrs; 15 Dec 1994 ± 1wk) adult: Born in Sonso, well habituated, relatively small head compared to body, pointy head, small ears, upturned nose.

BAL **Balvenie** ♂ (BAH1; 30th Sept 2012 ± 1 wk – disappeared end of Oct 2014)

BRI **Brian** ♂ (BAH2; 3yrs; 15th Nov 2015 ± 1wk) infant.

BYZ Byazi** (31yrs; 1987 ± 3yrs) adult: Large, very bald, head; very large round ears that stick out, right ear missing a corner at the top, deep dent in centre of the nose. Name means sweet potato because of her head shape.

BAR **Baraka** ♂ (BYZ1; 6yrs; April 2012 ± 1month) juvenile.

BTK **Bitakuli** ♀ (BYZ2; tbc) infant. Name means potato (family trait).

CHP Chapati*** (28yrs; 1990 ± 5yrs) adult: Right hand maimed and fingers wasted. Large bald spot, strong brow ridge continues to side of eyes. Big ears, large part missing of top left ear. Rarely seen.

CAE **Caelidh** ♀ (CHP1; 11yrs; 2007 ± 1yr), subadult.

CIS **Ciska** ♀ (CHP2; 6yrs; Sept 2012; ± 3months), juvenile.

DAD Dada*** (31yrs; 1987 ± 5yrs) adult: Round body and face, pointy mouth, ears flat to side of face, long hair on both sides of cheeks, small nose with wide elongated nostrils.

DUN **Dun-Edin** ♂ (DAD1; 13yrs; 2005 ± 1yr), subadult: Long brown face, dark patches on both sides of nose, long round ears, nose and eye-brow ridge resembles Dada.

DAV **David** ♂ (DAD2; 5yrs; 6th August 2013; ± 1 month), infant.

DAI Daima*** (31yrs; 1987 ± 5yrs) adult: Long face, pointy-head with round bald patch, big round sticking out ears. Long hair at sides of ears. Round and protruded eye brow ridge.

DAU **Daudi** ♂ (DAI1; 14yrs; 2004 ± 1 yr), subadult: Very pointy head, big brown circular ears, dimpled face, appears to have old snare injury to left hand. Often moves independently. (Daudi is the name David in Runyoro, David was chosen because he was courageous when young, going alone in the tree without his mother).

DAR **Darwin** ♂ (DAI2; 8yrs; 2010 ± 1yr), juvenile: brown face, long hair around face, small bald spot, pointy-head

Waibira Community Chimpanzees

(last update in Jan 2018 C. Hobaiter)

- DAW **Dawa** ♀ (DAI3; 2yrs; Feb 2016 ± 6mo), infant.
- HOB **Hobaiter***** (38yrs; 1980 ± 5yrs) adult: Distinctive strong white beard, eyes close together, V-shaped notch missing from left ear.
- HAR **Harris** ♂ (HOB1; 9yrs; 2009 ± 1yr), juvenile.
- HOB2 HOB2 unsexed (HOB2, seen briefly on camera trap Jan 2017; born 2015 ±6mo).
- IMP **Impia***** (2006 ± 1yr) *Light brown face, rounded body with large belly (possibly an orphan). Two symmetrical bald spots on top of head, wrinkles beneath eyes. (Last seen 2015 – likely dead/emigrated.)*
- ISO **Isolde** (1996 ± 2yrs) *Looks like Nora, darker face, deep eyes and nervous. (Last seen 2011 – likely dead/emigrated).*
- JIN **Jinja**** (30yrs; 1988 ± 3yrs) adult: missing right hand above wrist, big protrusive ears, flat nose. Small white beard and large bald spot.
- JNO **Jino** ♂ (10yrs; 2008 ± 1yr), juvenile: from 8th May 2015 JIN was seen regularly moving with this young juvenile (her infant or orphan is unclear).
- KET **Ketie*** (20yrs; 1 Sept 1998 ± 1wk) adult: Brown face with dark spots under her eyes, medium-sized neat bald spot, big brown ears. Thin arms and legs. Sonso immigrant.
- KYO **Karyo** ♀ (KET1; 2yrs, 1 Dec 2015 ± 1wk – 7th Jan 2018). *Died probable respiratory infection. KET carried the dead infant for 2-3 weeks.*
- KID **Kidepo*** (40yrs; 1978 ± 5yrs) adult: Small bodied, very pointy-head, bald patch on forehead, ears flat to the head, folded on top, small notch on the top of left ear, grey legs. Almost certainly the mother of Ila (travel together in family group, begs from her), and possibly mother to Kasongoire; so KAR marked as KID2 (but may be KID3).
- KAR **Karamoja** ♀ (KID2; 9yrs; 2009 ± 1 yr), juvenile: very long hair around face and over body, large ears but flat to head, pointy-head with small bald-patch.
- KIB **Kibale** ♀ (KID3; 2yrs, 1st Sept 2016 ± 1wk), infant. Thin scar along top of the head – may heal.
- KIP **Kipepeo*** (21yrs; 1997 ± 1yr) adult: Protruding butterfly shaped ears, medium deep dimples, thick eyebrow ridge, deep set eyes, very small bald patch with thin hair, grey face.
- KIL **Kilimanjaro** ♂ (KIP1; 4yrs; 1st Mar 2014 ±1 week), infant: seen in December 2014 with a deep wide injury across forehead, permanent scar.
- LIR **Liran*** (37yrs; 1981 ± 5yrs) adult: Deep eyes, heart-shaped rounded brow ridge around eyes and wrinkles around and under eyes, small nose with center dent, Small bald patch. Ears and head rounded.
- LAN **Lahni** ♂ (LIR1; 16yrs; 2002 ± 1yr) adult: Brown long face, very large round ears. Long wrinkled/wizened face with close-set eyes. Snare wire around left four fingers just above thumb – Jul 2011 (Nov 2011- was first seen without the snare).
- LKU **Lokuyu** ♂ (LIR2; 8yrs; 2010 ± 6mo) juvenile: Large very round bowling-ball head, bald patch with hair swept back from forehead. Brow-ridge has a prominent cleft over each eye. Long thin arms and legs.
- LAM **Lamon** ♂ (LIR3; 3yrs, 1st Oct 2015 ± 2weeks), infant. Very large bald patch and large rounded ears.

Waibira Community Chimpanzees

(last update in Jan 2018 C. Hobaiter)

LOT **Lotty*** (34yrs; 1984 ± 5yrs) adult: Long face, big bald patch; big ears, flat and wide nose, heart shaped eye-brow ridge. Brown/grey hair on back, sclera visible if looking down or to sides. Dark patches on top of swelling. (Sister to NEV and GER?).

LIZ **Liz** ♀ (LOT1; 7yrs; 2011 ± 6mo), juvenile. Big ears, heart shaped brow ridge, bald patch on top of head like mother. Very light golden-brown eyes.

LOT2 *LOT2 unsexed (LOT2; possibly born premature, 21st Nov 2017 – 21st Nov 2017)*

MSD **Masindi****** (33yrs; 1985 ± 3yrs) adult: Very strong rounded brow ridge, short scrubby hair on top of head, big protrusive ears. Snare injury to left foot – toes appear clenched, possible snare injury to right hand.

MER **Merkley** ♂ (MSD1; 10yrs; 2008 ± 1yr), juvenile.

MSD2 *MSD2 unsexed (MSD2; Sept 2012 – ???) not present in 2014*

MIK **Micky** ♂ (MSD3; 4yr; March 2014 ± 2 months), infant. Very large round ears.

MAT **Mathaai****** (28yrs; 1990 ± 2yrs) adult: Snare injury on both hands- right hand missing, left hand is badly hooked. Big round ears, bald head, small white beard and sunken eyes. Feb 2013 was seen on camera traps with infant, Apr 2013 observed with infant on FE tree. April 2016 seen with new infant, Jan 2017 seen without infant on camera trap (may have died much earlier) and with badly swollen left foot (injury/snare unclear).

MAT1 *MAT1 unsexed (MAT1; Dec 2012 ± 1 wk - ?? April 2013)*

MAT2 *MAT2 unsexed (MAT2; Feb 2016 ± 1 month - ?? Jan 2017)*

MON **Monika*** (15yrs; 13 July 2003 ± 2wks) adult: freckled face, round body, long hair, white beard, Sonso immigrant arrived in Sept 2014.

MON1 *MON1 unsexed (MON1; (5th Sept 2017 ± 1 wk - 16th Sept 2017; infanticide, 1st seen with infant on 12th Sept).*

NEV **Ndito-Eve*** (34yrs; 1984 ± 3yrs) adult: Short white beard, close cropped hair, distinctive white sclera on left eye, crooked swelling.

NAT **Natan** ♂ (NEV1; 12yrs; 2006 ± 1 yr) subadult: Big ears, very independent, calm with observers.

NOA **Noah** ♂ (NEV2; 8yrs; 2010 ± 6 mo) juvenile: Light brown face, big ears, almond eyes.

NIM **Nimba** ♀ (NEV3; 3yrs, 15 Aug 2015; ± 2 weeks) infant.

NOR **Nora*** (22yrs; Feb 1996 ± 3wks) adult: Born in Sonso, right hand snare injured but hard to see now, very well habituated.

NAR *Naril* ♀ (NOR1; 1 August 2012 ± 1 week – 17 August 2012)

NAL **Nalala** ♂ (NOR2; 5yrs; 24th July 2013 ± 1 week) infant.

ONY **Onyofi**** (19yrs; 1999 ± 2yrs) adult: flat eyebrow ridge, right hand is hooked from snare with extended index finger, bald patch on top of head, side-burns, pointy shaped head. (Onyofi = finger).

PEN **Penelope**** (31yrs; 1987 ± 3yrs) adult: Right ear is badly torn, big bodied, short hair on top of the head.

PHI **Philipo** ♂ (PEN1; 10yrs; 2008 ± 1yr), juvenile: Snare injury- missing left foot from the ankle down, long hair, big ears, lots of wrinkles on face. Jan 2013 was seen with a snare wire to right hand, as of Aug 2013 snare wire still there, wire gone Dec 2014.

Waibira Community Chimpanzees

(last update in Jan 2018 C. Hobaiter)

- PAV **Pavela** ♀ (PEN2; 5yrs; 18th Oct 2013 ±2wks), infant. Very long hair around face.
- QEN **Queen**** (15yrs; 2003 ± 1yr) adult: first seen Jan 2017, calm, brown face, long hair, top of the left ear is flattened as if cut off, and pale brown/gold eyes (formerly SF3).
- RAC **Rachna**** (18yrs; 2000 ± 2yrs) adult: Small head, right hand missing 4 fingers, dark, deeply wrinkled face, long facial hair, relatively calm.
- RIT **Rita**** (28yrs; 1990 ± 5yrs) adult: Dark long slim body and limbs, big pointy bright ears folded at the top (compare to body), small white beard. Distinctive vertical center dent on nose. Oestrus has a series of bumps/lumps on the right when swollen (*Had been double labeled as female GAY, Gaya with infant GOP, Gophin; also labeled in 2013 as AF, INF M (adult female with male infant)*).
- ROB **Robert** ♂ (RIT1; 9yrs; 2009 ± 1yr) juvenile: flat protruded eye-brow ridge, big folded brown ears (like Rita's). Oval eyes, deep dimples.
- RWZ **Rwenzori** ♂ (RIT2; 2yr; 15th Jul 2016 ± 1wk) infant.
- SAN **Santa**** (18yrs; 2000 ± 1year) adult: brown face, small bald patch on the forehead, snare injury to the right-leg, foot is there but twisted, walks on shin/ankle (first seen 2012).
- SDK **Sadaka** ♂ (SAN1; 3yrs, 2015 ±6mo), infant. Name means the sacrifice or gift.
- SHY **Shay*** (25yrs; 1993 ± 3yrs) adult: Short white beard, bald large round head, protruded mouth with upturned (pig-like) nose, possible snare injury to left hand, stiff fingers.
- SUL **Sula** ♀ (SHY1; 8yrs; 2010 ± 6mo) juvenile: Very light brown face, big round eyes, prominently arched brow ridges.
- SHY2 **SHY2** unsexed (SHY2; 10th Oct 2017 ±1wk; first seen 10th Nov).
- SHU **Shundo**** (31yrs; 1987 ± 5yrs – 15th Jan 2018 ± 1day) adult: Large distinctive grown on swelling (*Shundo means wart in Rukiga*) Formerly SF1. Cause of death unknown - children seen without the mother on 16th Jan, both carrying infant. Infant disappeared after 2days.
- SPN **Spini** ♀ (SHU1; 10yrs; 2008 ± 1yr) juvenile, long hair, dark face, moving with SDT.
- SDT **Soldati** ♂ (SHU2; 4yrs; 2014 ± 6mo) infant. Moving with older sister SPN and LAF. Long hair and two clear narrow dark stripes either side of nose in otherwise pale face.
- SHU3 **SHU3** (SHU3; Nov 2017 ± 2wks – 17th Jan 2018 ± 1day) unsexed. Seen being carried by siblings on 16th Jan and 17th Jan, but disappeared after.
- TAT **Tatu*** (19yrs; 1999 ± 1yrs) adult: left leg is missing from below the knee (Tatu means three). Has a round notch out of the right ear. Small dark face, long facial hair, relatively calm, can be followed on ground.
- TIB **Tibu**** (20yrs; 1998 ± 1yr) adult: very light brown face similar to KET, slim build, smooth hair, a little nervous, no snare injuries (Tibu means 'to heal').
- TBY **Tembaya** ♂ (TIB1; 1yr, 21st Sept 2016 ± 1wk), infant. Name means 'to walk' in honour of Waibira mornings.
- VIR **Virunga***** (34yrs; 1984 ± 3yrs) adult: Very strong, stocky body type. Bald head, large rounded ears, right one has part missing. Right hand wasted, especially 1st and 2nd fingers. Silver legs, large growth/lump on right at base of swelling. Only seen on camera traps until 2016. Seen on camera trap in 2017 with new infant.
- VIN **Vincent** ♂ (VIR1; 6yrs; 2012 ± 6mo), juvenile.
- VIR2 **VIR2** ♂ (VIR2; 2yr, 21st Sept 2016 ± 1mo), infant.

Waibira Community Chimpanzees

(last update in Jan 2018 C. Hobaiter)

We still have several unknown, unnamed females; e.g. Adult female with the arm missing from the elbow. Family with the subadult female. Long-haired female. Subadult female around 12yrs with very straight brow-ridge, probably Waibira born. Adult stranger: right ear folded/missing chunk, left ear folded

MALES

- ABO Abooki** (21yrs; 1997 ± 2yrs), adult: Small round head, thin and long body. Black face, mouth hangs open, eyes close together. Relatively nervous.
- AKL Akilli** (1986 ± 3yrs): *Big bodied, wide body and large square-face, short white bearded, huge nostrils (gorilla nose), mole on right cheek, (last seen in 2016).*
- ALF Alf** (20yrs; 1998 ± 1yr), adult: Pointy head, brown ears, triangle shaped nose and mouth, sunken cheeks, relatively bald head.
- ARD Ardbeg** ♂ (AKK1; 13yrs; 2005 ± 1yr) subadult: Dent down middle of nose, relatively flat brow ridge, big ears.
- ATA Atayo** (23yrs; 1995 ± 1yr), adult: Snare injury to right hand (bald spot on wrist), left ear is cut. Brown face with dark patches on cheeks, big bodied with brownish body-hair, still nervous around observers. (not seen since August 2017).
- BEN Ben** (26yrs, 1992 ± 2yrs), adult: Very brown face and body, thin pale line from left eyebrow to cheek bone – old scar? Bald, sparse hair on back and head but with side burns, long large ears – stick out, shallow brow-ridge. Missing a part of the index finger on left hand. (Alpha from 2017)
- CAM Campbell** (2000 ± 1yr): *Brown face, prominent and round eye-brow ridge, vertical dent in middle of nose, small ears flat on sides of face, square muscle body (last seen 2013).*
- CHN Chandia** (27yrs; 1991 ± 3yrs), adult: Right ear semi-circle like Injury, eyebrow ridge protrudes, long facial hair, and diagonally arranged nostrils. Three middle toes are missing on left foot.
- DAU Daudi** ♂ (DAI1; 14yrs; 2004 ± 1 yr), subadult: Very pointy head, big brown circular ears, dimpled face, appears to have old snare injury to left hand. Often moves independently. (Daudi is the name David in Runyoro, David was chosen because he was courageous when young, going alone in the tree without his mother).
- DOU Douglas** (42yrs; 1976 ± 5yrs), adult: Full distinctive long white beard, small body size, bald patch on forehead, obvious small lump on the end of nose between the nostrils. Toes on right foot deformed, probable snare injury.
- DUN Dun-Edin** ♂ (DAD1; 13yrs; 2005 ± 1yr), subadult: Long brown face, dark patches on both sides of nose, long round ears, nose and eye-brow ridge resembles Dada.
- EGU Eguma** (1993 ± 2yrs): *Skinny body, huge ears, bald head with longer hair from ears down, very large testes (possible illness?). Prominent heart-shaped brow ridge. Left-hand ring-finger (and possibly index-finger) appears bent, old injury (last seen Sept 2014).*
- ELG Elgin** (1983 ± 3yrs): *Flat wide nose with V-shaped slit beneath it, wide bald patch with 3 visible lumps, left right and center, very wrinkled face. Short hair and facial hair, small flat ears. High-up in the hierarchy, big bodied. Very calm towards observers. (last seen Aug 2011).*
- FID Fiddich** (16yrs; 2002 ± 1yr), adult: Black face with large belly and long hair, balding on top, very large round ears, right one with tear. Always seen alone with large adult males – possibly orphan/very young independent, small bodied. Very calm when observed.

Waibira Community Chimpanzees

(last update in Jan 2018 C. Hobaiter)

- GER **Gerald** (25yrs; 1993 ± 2yrs), adult: All toes are missing on left foot, big bodied, short facial hair (nicely shaped around the face), flat nose, and pointy mouth. Serious tear to right-side of mouth in 2014, lip now hangs open. Right hand middle finger doesn't bend.
- HAM **Hamish** (1986 ± 5yrs): *Dark, small and centered face, white beard, left ear shaped as a heart (Last seen May 2012).*
- ILA **Ila** (19yrs; 1999 ± 1yr), adult: Dark long face with long distinctive hair and small bald patch. Flat nose with elongated nostrils (resembles KID, might be her son; travels with her as a family group, begs from her etc.) and pointy ears.
- JNO **Jino** ♂ (10yrs; 2008 ± 1yr), juvenile: from 8th May 2015 JIN was seen regularly moving with this young juvenile (her infant or orphan is unclear).
- JRA **Jura** (1966 ± 5 yrs): *Older small-bodied male, distinctive but short white beard, very wrinkled face, short, scrubby hair sticks out, shallow-eyes under thick brow ridge. Flat nose with deep dent down centre (Last seen August 2011).*
- KAS **Kasongoire** (23yrs; 1995 ± 2yrs), adult: Small bodied, pointy head, bald patch on forehead, cut on upper part of left ear (might be an injury as a big part is missing), right pointy ear (possible older son to Kidepo - resembles her, travel/groom together).
- KEV **Kevelee** (37yrs; 1981 ± 3yrs), adult: Large triangular shaped head – flat on top, slender neck. Ears flat to head, heart-shaped strong brow ridge, and short scrubby hair. (Alpha until 2017).
- LAF **Lafroig** (15yrs; 2003 ± 1yr), subadult: Snare injury to right hand. Black face with long smooth hair, big brown ears.
- LAN **Lahni** ♂ (LIR1; 16yrs; 2002 ± 1yr) adult: Brown long face, very large round ears. Long wrinkled/wizened face with close-set eyes. Snare wire around left four fingers just above thumb – Jul 2011 (Nov 2011- was first seen without the snare).
- LIL **Lillo** (9yrs, 2009 ± 1yr), juvenile. Seen regularly with the group since 2016 but not together with a female, orphan/son of very peripheral mother. Mouth often hangs open, strong heart-shaped brow, narrow face, small white beard.
- MAC **Macallan** (20yrs; 1998 ± 1yr), adult: Long narrow face with some brown, two black patches either side of nose, long narrow smooth nose with angular nostrils, small white beard, long limbs, missing a part of the index finger and the thumb on left hand.
- MAP **Mapasa** (1983 ± 4yrs): *Stocky medium body; left ear tattered, folded on top and torn almost away at base; heart-shaped brow ridge, round eyes, small bleached white spots under nose. Very short white beard and relatively bald head. Snare injury to right hand.*
- MAS **Masariki** (15yrs; 2003 ± 1yr), subadult: Very oval eyes, deep dimples, protruding eyebrow ridge, long facial hair, big protruding ears, bald patch with some thin hair.
- MOR **Morangie** (34yrs; 1984 ± 3yrs), adult: Heart-shaped brow ridge, round pale eyes (cataracts?). Distinctive white beard, big round ears. Hair on top of head sticks up.
- MUG **Mugisha** (15yrs; 2003 ± 1yr), subadult: white beard, still some white/pale skin around tail puff, brown face, big ears, long limbs, dark hair, quite calm.
- NAT **Natan** ♂ (NEV1; 12yrs; 2006 ± 1 yr) subadult: Big ears, very independent, calm with observers.

Waibira Community Chimpanzees

(last update in Jan 2018 C. Hobaiter)

- SAM **Sam** (19yrs; 1999 \pm 1yr), adult: Long dark face with long hair, head with big bald patch and big round ears with pink at edges. Extremely calm with observers.
- SDT **Soldati** (SHU2; 4yrs; 2014 \pm 6mo) infant. Son of Shundo, probably orphaned. Moving with older sister SPN and LAF. Long hair and two clear narrow dark stripes either side of nose in otherwise pale face.
- TAL **Talisker** (42yrs; 1976 \pm 5yrs), adult: Very dominant, large, adult male. Small white beard, pointy ears lie flat to the head with folded tops, small light patch under nose between nostrils, clear raised lump on brow ridge above right eye, some white to scerla.
- TRS **Tristan** (32yrs; 1986 \pm 5yrs), adult: Right ear has a deep fold – looks heart shaped, deep dimples, flat face, right brow-ridge has a clear dent, head is almost bald. Short index finger on left hand. Not seen since November 2017.
- URS **Ursus** (31yrs; 1987 \pm 3yrs), adult: “Bear like” head with small round ears and flat top, clear vertical dent in centre of nose, round eye-brow ridge.
- WAL **Wallace** (1973 \pm 5yrs): *Looks very like Jura but younger. Big bodied, long face, long limbs. Strong scrubby white beard, deep sunken eyes. Vertical slit like nostrils. Big ears flat to the head.*
